

Jagannath International Management School

Vasant Kunj, New Delhi-110070

(Affiliated to Guru Gobind Singh Indraprastha University, New Delhi)

Recognized u/s 2(f) by UGC & Accredited with 'A+' Grade by NAAC

Participant of UNGC New York and ISO 9001:2015 Quality Certified

Laboratory Index

Data Visualization & Analytics BCAT 312

S.No	Practical								
1	Write a program to create a DataFrame have E-commerce data and perform selection of row/column using loc() and iloc()								
2	Create a Series object S5 containing numbers. Write a program to store the square of the series values in object S6. Display S6's values which are >15.								
3	Write a program to fill all missing values in a DataFrame with zero.								
4	Program for combining DataFrames using concat(), join(),merge()								
5	Implementing Line plot, Dist plot, Lmplot, Count plot using Seaborn library								
6	Create a DataFrame ndf having Name, Gender, Position, City, Age, Projects. Write a program to summarize how many projects are being handled by each position for each city? Use pivot()								
7	Marks is a list that stores marks of a student in 10 unit test. Write a program to plot Line chart for the student's performance in these 10 test.								
8	Write a program to plot a horizontal bar chart from the height of some students.								
9	Write a program to implement ANNOVA.								
10	Write a program to show correlation between two randomly generated numbers .								
11	Write a program to draw bar graph for the following data for the Medal tally of CWG-2018:- <table><tr><td>Gold</td><td>Silver</td><td>Bronze</td><td>Total</td></tr><tr><td>26</td><td>20</td><td>20</td><td>66</td></tr></table>	Gold	Silver	Bronze	Total	26	20	20	66
Gold	Silver	Bronze	Total						
26	20	20	66						
12	Implementing Line plot, Dist plot, Lmplot, Count plot using Seaborn library								
13	Create a DataFrame namely aid that stores aid (Toys, books, uniform ,shoes) by NGO's for different states. Write a program to display the aid for:- (a) Books and Uniforms only (b) Shoes only								
14	Write a program to show correlation between two randomly generated numbers .								
15	Write a program to implement Covariance.								
16	Create a GUI based form for admission purpose for your college. The created GUI based application form is to connected to a database and use insert query to enter data.								

S.No	Assignment	Dataset
1	1. Perform Data Wrangling 2. add a 'Total' column that sums up the total immigrants by country over the entire period 1980 - 2013 3. check to see how many null objects we have in the dataset 4. Find out the highest and lowest Immigration 5. filtering on the list of countries ('Country') and the data for years: 1980 - 1985. 6. Sort out dataframe on 'Total' column, in descending order to find out the top 5 countries that contributed the most to immigration to Canada.	Canada.csv
2	1. Handle missing data in different ways 2. Correct the data type of different data values as per requirement 3. Standardize and normalize the appropriate data attributes 4. Visualize the data as grouped bar graph using Segmentation 5. Converting a categorical data into numerical indicator variables	Laptop.csv
3	1. There is no difference between the BMI of male and BMI of female, Confirm 2. The average charges of smokers are less than or equal to nonsmokers, Confirm 3. The average charges increases with age, Confirm 4. Determine if the proportion of smokers is significantly different across the different regions 5. Using the statistical evidence, compare the BMI of women with no children, one child, and two children.(Use Anova)	Insurance.csv
4	1. create a Line plot, Box plot and Scatter plot to visualize the immigrants (to Canada) trend during 1980 to 2013 2. customize the above plot's appearance in Marker size, color and line style 3. include the background grid, a legend and try to change the limits on the axis 4. find out the frequency distribution of the number (population) of new immigrants from the various countries to Canada in 2013 5. What is the immigration distribution for Denmark, Norway, and Sweden for years 1980 – 2013 6. Create a pie chart representing the total immigrants proportion for each continent 7. create a line and scatter plot in one row using sub plots	Canada.csv
